WELCOME

For more than 110 years, COPPUS portable ventilators and cooling products have been recognized as leaders in providing reliable ventilation to meet the demands of safety and maintenance personnel around the world in refineries, chemical plants, steel mills, paper mills, utilities, fabrication shops, and a host of other industries including construction, railroads, airlines, shipbuilding, marine, and food/beverage processing.

GENERAL APPLICATIONS

- Confined space fresh air supply
- · Fume removal (degassing)
- · Process cooling
- · Equipment cooling
- Source capture fume exhaust
- · Personnel heat stress relief
- Air curing and drying of paints and coatings

FEATURES / ADVANTAGES

- One-year warranty
- Large product selection to meet nearly any portable ventilation or cooling need
- Axial and centrifugal designs
- · Choice of drives: electric, pneumatic, steam, or water
- Explosion-proof models
- Premium heavy-duty, continuous-operation motors
- · Heavy-duty construction to meet industry demands
- Accommodates flexible duct
- Accessories

AVAILABLE UPON REQUEST

- Application recommendations
- Product specifications
- Performance curves (pdf)
- · Instruction manuals (pdf)

COPPUS Quick reference guide

FAQs / Common Terms					4
AIR MAX 12	Electric TE	12 in (305 mm) Vaneaxial	2,200 (3,735)	Lightweight, compact, high air volume	5
CADET	Electric TE or EP	8 in (203 mm) Vaneaxial and Centrifugal	560-1,300 (933-2,209)	Lightweight and compact	6
VANO 175CV, 250CV	Electric TE and EP	8 in (203 mm) 12 in (305 mm) Vaneaxial	1,500-3,000 (2,549-5,098)	Rugged, durable, low-profile design for high air volume	8
DOUBLE-DUTY Heat killer	Electric TE and EP	24 in (610 mm) and 30 in (762 mm) Vaneaxial	7,100-17,000 (12,000-28,890)	Floor mount and optional wall mount	10
JECTAIR Jectair Hornet	Compressed Air	8 in (203 mm) to 14 in (356 mm) Venturi	1,370-8,900 (2,328-15,121)	High-air flows, lightweight, maintenance-free	12
TA16-5000 TA16-5500	Electric TE and EP	16 in (406 mm) Tubeaxial	5,000-5,500 (8,495-9,345)	Heavy-duty, high volume for exhaust and fresh air	14
PORTAVENT	Electric TE and EP	6 in (<mark>152 mm)</mark> Centrifugal	560-940 (951-1,597)	Ideal for removing welding fumes; multi-position stand	15
VENTAIR	Electric TE and EP	8 in (203 mm) to 16 in (406 mm) Centrifugal	1,700-10,700 (2,890-18,180)	Five sizes up to 30 HP; supply air to multiple work areas	16
REACTION Fans	Compressed Air	12 in (305 mm) 16 in (406 mm)	2,140-5,100 (3,636-8,665)	Ideal for hazardous locations; all aluminum-cast housing	18
REACTION Fans	Compressed Air	20 in (508 mm) 24 in (610 mm)	11,000-16,900 (18,689-28,700)	Bolts directly to tanks with standard API manways	19
CP-20	Steam or Air	20 in (508 mm) Axial	11,200 (19,029)	Bolts directly to standard API 20 in manway	20
MARINE Ventilators	Water	12 in (305 mm) & 15 in (381 mm) Axial	4,600-8,400 (7,815-14,275)	Cargo tank ventilators; mates to 12.5 in (318 mm) deck opening	21
ACCESSORIES				Add convenience and improve productivity	22

TE = totally enclosed

EP = explosion proof

COPPUS Frequently asked questions

COMMON TERMS

CONFINED SPACE

Large enough area to be occupied by an individual, but with limited or restricted means for entry or exit; not normally designed for continuous occupancy.

CFM

Cubic feet per minute—measurement of flow handled by a fan.

STATIC PRESSURE

Usually expressed in inches water gauge (Wg); pressure measured in a direction normal to the air flow; static pressure combined with velocity pressure equals total pressure.

BLOCKED TIGHT STATIC PRESSURE

Operating condition in which the fan outlet is completely closed, resulting in no air flow.

FREE AIR DELIVERY

Maximum airflow where static pressure across the fan is zero.

CAPTURE VELOCITY

Air velocity at any point in front of the hood opening necessary to overcome opposing air currents and to capture the contaminated air at that point.

DECIBEL LEVELS

Sound data on COPPUS products are based on tests conducted with units operating at published speeds. No attachments for attenuating sound were used [dBA levels recorded at 5 ft (1.5 m)].

WHAT TYPE OF VENTILATOR DO YOU RECOMMEND FOR EXPLOSION-PROOF ENVIRONMENTS?

If compressed air is available as your utility, we recommend our RF series ventilators or our Jectair (venturi style) air movers. Pneumatic-drive ventilators are often desirable for hazardous locations. If electric drive is preferred or required, we offer most of our fans and ventilators in explosion-proof models. Explosion-proof units require all electrical connections to be enclosed and moving mechanical pieces to be constructed of material so as not to create sparks. This requires special motors and starters, as well as fan blades and other moving parts to be made of non-sparking materials such as aluminum, stainless steel, fiberglass, or plastic.

WHY ARE PLUGS NOT STANDARD ON EXPLOSION-PROOF UNITS?

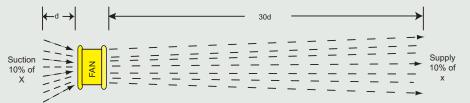

Local electrical codes can vary for hazardous location equipment operation, creating a variety of different plug-receptacle configurations. We recommend that either the plug be installed by a local electrician, or the type and part number of the correct plug be submitted to us in writing for factory installation to ensure local code compliance.

WHAT IS THE MAXIMUM HORSEPOWER I CAN USE WITH 115V POWER?

A 1.5 HP motor is the largest practical power unit to effectively run on single-phase power. A larger HP motor will generate very large current in-rushes, tripping the electrical protection breaker. Our electrical units have thermal overload protection.

IS THERE A DIFFERENCE IN AIR VOLUME ON THE SUCTION AND DISCHARGE OF THE VENTILATOR?

No. The given air volume is the same whether the ventilator is used as an exhauster or blower; however, there is a significant difference in the air velocity at a given distance away from the fan. For example: one foot (305 mm) away from the suction end of a 12 in (305 mm) fan, the air velocity will drop by 90 percent compared to only a three percent drop on the supply side.

Air velocity is reduced as the distance from the fan increases on both the inlet (exhaust) and outlet (delivery) sides; however, the rate of reduction in air velocity is significantly greater on the inlet side of the fan.

d = diameter of the fan face

x = air velocity of the fan face

COPPUS Air MAX-12

Economical, high-volume tube axial blower

MODEL/SPECIFICATIONS

MOTOR

TE 3/4 HP with integral on/off switch, 115V/6.8 amp, Class B insulation, auto reset thermal overload protection; GFCI at plug end on 115V models.

FREE AIR

2,200 cfm (3,740 m³/hr)

WEIGHT

44 lbs (18.14 kg)

HOUSING

18-gauge steel, powder-coated with carry handle and anti-vibration foot pads; rolled bead on ends for added strength and attaching flexible ducting; safety screens attached per OSHA guidelines.

PLEASE NOTE:

Not available for Class 1, Div. 1 (hazardous locations) applications.

TECHNICAL DATA

FREE AIR DEC	IBEL LEVELS					
Air MAX 12 74 dBA						

DESCRIPTION

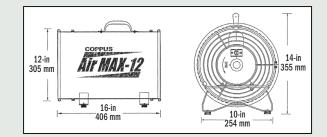

This 12 in (305 mm), lightweight, rugged blower delivers up to 2,200 cfm (3,740 m³/hr) for confined space ventilation and fresh air supply.

FEATURES / ADVANTAGES

- Rugged, all-steel housing construction
- Integral on/off motor switch
- Fixed guide vanes for improved performance
- Glass-reinforced, polypropylene, non-sparking fan blade
- 20 ft (6.1 m) cord with GFCI at plug end

- Anti-vibration foot pads
- · Available with TE motors only; not for use in hazardous areas

COPPUS CADET[®] Vaneaxial

Ideal for utility underground and light industrial confined space ventilation

Model VAC

MODEL/SPECIFICATIONS

MODEL VEP

Vaneaxial hazardous location electric drive.

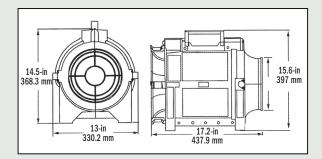

DESCRIPTION

These versatile, rugged and economical ventilators deliver exceptional air flow in a compact, lightweight design—and their non-corrosive injection-molded housing is nearly indestructible. They are ideal for utility underground and light manufacturing confined space ventilation and are available in a variety of models.

FEATURES / ADVANTAGES

- Flame-resistant injection-molded housing
- · Glass-filled, polyester resin, spark-resistant fan blade
- · Accommodates 8 in (203 mm) flexible duct
- 60Hz/50Hz AC motors
- Hazardous location motors NEC Class/Div1

COPPUS VANO[®] 175CV & 250CV

Rugged, reliable ventilator models

DESCRIPTION

COPPUS ventilators revolutionized air moving equipment more than 60 years ago with the introduction of the VANO models. The VANO models offer a fixed guide vane design that delivers high volumes of air while maintaining static pressure for exhausting fumes and delivering fresh air. A rugged, durable, high-performance design makes the VANO models ideal for ventilating tanks, process vessels, tank cars, manholes and other confined spaces.

FEATURES / ADVANTAGES

- Straightening fixed guide vanes for improved static pressure performance
- · Accepts ducting at inlet and outlet ends
- · Converts to exhaust fumes from bottom of tanks
- Available with totally enclosed (TE) or explosion-proof (EP) motors and compatible switch; all models supplied with 15 ft (4.572 m) power cord
- · Heavy-gauge, powder-coated steel and cast aluminum construction
- Spark-resistant fan blades
- Automatic thermal overload protection standard on VANO 175CV and 250CV models
- Optional tripod and transport cart.

CONVERTIBLE DESIGN

By simply removing the inlet sleeves, the VANO 175CV and 250CV convert to vertical exhaust units.

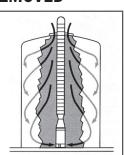

WITH INLET SLEEVE INSTALLED

The flexible duct can be attached to inlet and outlet ends. This allows fumes to be exhausted from a confined space, or fresh air to be delivered from a remote area.

WITH INLET SLEEVE REMOVED

Cut-outs on inlet end of CV models are exposed for exhausting heavierthan-air fumes from the bottoms of tanks, vats, drums, and other confined spaces.

OPTIONAL ACCESSORIES

TRIPOD

Lifts VANO 175 and 250 models off ground to prevent dirt pick-up and allow smooth duct flow into elevated confined space openings. Bolts to VANO and allows positioning

TRANSPORT CART

Built of tubular steel with large diameter rubber tires increases portability of VANO 175 and 250 models. Duct can be attached without removing VANO from cart. Built-in crane lift hook.

COPPUS DOUBLE-DUTY[™] HEAT KILLER

Powerful industrial fan for cooling products processes and personnel

DESCRIPTION

With airflows up to 17,000 cfm (28,890 m3/hr) the Double-Duty[™] Heat Killer (DDHK) is one of the most powerful and versatile portable air movers on the market today. The patented, adjustable guide vane design allows air flow control—from a gentle breeze for personnel cooling, to a concentrated jet blast for product and process cooling.

FEATURES / ADVANTAGES

- Adjustable guide vanes allow varied air movement from a gentle breeze to a jet blast
- Available in 24 in (610 mm) and 30 in (762 mm) models
- · Available in floor stand or wall mount models
- · Heavy-duty, rugged steel housing and frame
- Protective screens meet OSHA guidelines
- Available with TE and EP motors
- Hazardous location switches and motors meet NEC Class I, Division I, Group D and Class II, Division I, Groups F and G specifications
- Thermal overload protection on motors

*Note: EP plugs sold separately to meet local codes

DDHK WALL MOUNT KIT

Easy retrofit wall mount kits are available for existing floor stand models; kits include wall bracket and fan U-bracket.

- Frees up valuable floor space
- Ensures permanent location
- Design permits 360 degree rotation with variable tilt up or down of 155 degrees (90 degrees down, 65 degrees up)

COPPUS Jectair[®] HP and Hornet HP

High-performance, highly efficient Venturi air movers

JECTAIR DESCRIPTION

The unmatched performance of the COPPUS Jectair[®] HP is recognized throughout the industry. When compared with olderstyle air horns, the patented air mixing chamber of the Jectair[®] HP can produce up to a 40:1 air flow conversion and up to 26 percent savings on compressed air consumption.

FEATURES / ADVANTAGES

- Available in five sizes: 3S-HP, 3-HP, 6-HP, 8, or 9
- High-performance (HP) and Hornet models available in three sizes: 3S-HP, 3-HP and 6-HP
- Air flows range from 1,370 to 8,900 cfm (2,328 to 15,121 m3/hr)
- Induction ratios up to 40:1
- Multiple expansion nozzles machined into housing
- High static pressure capabilities
- Diffuser material available in steel, aluminum or shock-resistant polymer (Hornet HP)
- No moving parts (virtually maintenence-free)
- Static bonding cable (standard on all models) with spring tension grip and replaceable contact tips.

OPTIONS

- · Accepts flexible duct on diffuser end
- Inlet duct adapter available
- Tripod for stationary mounting available

JECTAIR HORNET DESCRIPTION

The Jectair Hornet HP features a lightweight, shock-resistant, conductive polymer diffuser that is virtually indestructable

JECTAIR HORNET FEATURES / ADVANTAGES

- · Available in three sizes: 3S-HP, 3-HP and 6-HP
- Polymer safely dissipates static electricity charges
- Diffuser is constructed of linear low-density polyethylene, rated
- UL 94 with maximum operating temperature of 160° Fahrenheit (93° Celsius)

MODEL/SPECIFICATIONS OPERATING PRINCIPLE

Compressed air or steam* is admitted into the Jectair through a single inlet connection in the housing leading to the mixing chamber. The air or steam jetted from the nozzle creates a "Venturi" action that induces a large volume of surrounding air to enter the Jectair through the aerodynamic inlet bell. The air is then discharged at high velocity through the horn-shaped diffuser.

* Steam use on steel diffuser units only.

NOTE: Operating efficiency depends on compressed air volume and pressure (see efficiency performance charts on next page).

SAFETY PRECAUTIONS

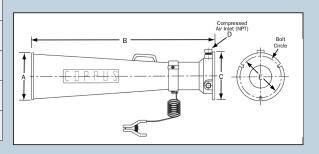

- Use bonding cables (standard on all COPPUS Jectair air movers) when operating in hazardous locations to prevent static electricity discharges
- Secure unit before admitting compressed air (or steam) to prevent damage or injury from high-reaction force
- Do not allow solid objects or debris to enter inlet housing during operation
- When exhausting fumes from an enclosed vessel, take care not to create a vacuum that could collapse the vessel

TA16	96 dBA

DESCRIPTION

The unique fan blade design not only allows exceptionally high air volume but also maximizes static pressure for better performance through longer runs of air duct. Typical ventilation applications include large tanks, tunnels, towers, and shipboard compartments; this fan is also ideal for product and process cooling.

FEATURES / ADVANTAGES

- \cdot TE or EP motor
- · Thermal overload protection
- · Powder-coated, heavy-gauge steel housing
- · Cast-aluminum or glass-filled fan blade provides spark-resistance
- · Skid-mounted for stability (optional casters available)
- · Duct can be connected at inlet and outlet ends
- Optional caster kit available

COPPUS Portavent®

Versatile centrifugal ventilator for source capture fume exhaust

MODEL/SPECIFICATIONS

Unique stand design offers multiple set-up options.

DESCRIPTION

The design, performance and versatility of the PORTAVENT centrifugal ventilator make it ideal for a wide range of industrial applications—welding and other fume removal; small tank purging; equipment cooling; confined space ventilation; and other maintenance and safety applications.

NOTE: PV-500 & PV-750 special order only.

FEATURES / ADVANTAGES

- Available in three models offering 560 to
- 940 cfm (951 to 1,597 m3/hr)
- Direct-drive 3,500 RPM fan motor
- Cast aluminum fan and housing provide
- spark-resistant construction
- Unique, multi-position stand offers a variety
- · of convenient set-ups
- · Accepts flexible duct at inlet and outlet ends
- · Backwardly inclined airfoil blades prevent motor overloads
- Inlet and outlet screens meet OSHA standards
- · TE and EP motors available on all models

COPPUS Ventair[®] TM

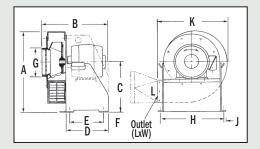

High-pressure centrifugal blower/exhauster

MODEL/SPECIFICATIONS ELECTRICAL SPECIFICATIONS

- Ventair models available with TE or EP (NEC classification) motors
- Single-phase (TM-4 only) specifications
- Multiple motor electrical classification

OPTIONS AND ACCESSORIES

- Motor starters
- · Beaded or flanged diffusers
- Flexible duct
- Multiple inlet duct adapter
- Vibration isolators

DESCRIPTION

This is a rugged, high-volume, high-pressure centrifugal fan. Backwardly inclined fan blades yield stable air flow through small diameter or long runs of duct. The high static pressure capabilities make this an ideal air mover for supplying fresh air or sourcecapturing welding and other fumes for multiple remote locations with optional, multiple inlet adapter.

NOTE: TM-5, TM-6, & TM-9 special order only.

FEATURES / ADVANTAGES

- Available in 1-, 2-, 5-, 15-, and 30-HP motors producing up to 10,700 cfm (18,179 m3/hr)
- One-piece, cast aluminum, spark-resistant, abrasion-resistant, dynamically balanced fan wheel
- · Heavy-gauge steel housing and base protects fan and motor
- Backward curved airfoil-shaped blades provide non-overloading power characteristics allowing peak performance through long runs of duct
- · TE and EP motors available
- 3,500 rpm motor directly connected to the fan wheel
- Variable outlet configuration

Optional four-inch (101.6 mm), multiple-duct adapter

COPPUS Reaction Fans RF-12, RF-16, RF-20, RF-24

Air-driven reaction fans

DESCRIPTION

MODEL/SPECIFICATIONS

RF-20 PERFORMANCE

Rugged, cast aluminum housing and fan blade make these fans ideal for hazardous locations and demanding ventilation projects. The RF design uses action-reaction principles; compressed air is discharged through nozzles located at the tip of the fan blade providing extremely efficient, high-volume, low-maintenance air movers.

RF-20, RF-24 FEATURES / ADVANTAGES

- 11,000 to 16,900 cfm (18,689 to 28,713 m3/hr) at 80 psig*
- Use for fresh air supply or fume exhaust
- · Can be carried or rolled to job site
- · Spark-resistant cast aluminum housing and fan blade
- Permanently lubricated bearings
- Flanges mate with 20 in (508 mm) and 24 in (610 mm) API tank openings

RF-12, RF-16 FEATURES / ADVANTAGES

- · 2,100 to 5,100 cfm (3,566 to 8,665 m3/hr) at 80 psig
- · Use for fresh air supply or fume exhaust
- Low compressed air consumption
- · Spark-resistant, cast-aluminum housing and fan blade
- · Virtually maintenance free
- Permanently lubricated bearings eliminate line oiler
- Cast-in handles and feet
- · Cast-in bead to accept 12 in (305 mm) and 16 in duct (406 mm)
- · Bolt holes allow optional adapter plates attachment

SWING-OUT ASSEMBLY FOR RF-20/24 AND CP-20

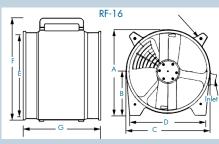

Personnel and equipment egress or entrance to tanks and vessels can be achieved quicker, easier and safer with the RF-20/24 and

CP-20 swing-out models; mounts to standard API 20 in (508 mm) or 24 in (610 mm) tank openings. Swing-out gate (constructed of cast aluminum) is held in closed position with industrial strength hook and loop fastener that can be opened and closed easily by pulling or pushing

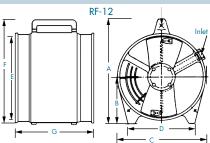

*Maximum operating pressure 100 psig (7 kg/cm2)

COPPUS

Air- or steam turbine-driven blower/exhauster

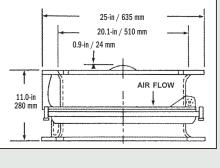

DESCRIPTION

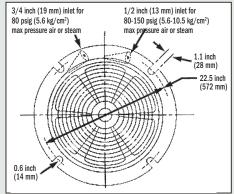

This powerful fan is designed for fast and thorough degassing, ventilating or cooling of large process vessels such as columns, towers, reactors, scrubbers, furnaces, and storage tanks.

FEATURES / ADVANTAGES

- · Delivers air flow up to 11,200 cfm (19,029 m3/hr)
- · Can be used as blower or exhauster
- Fits 20 in (508 mm) API tank opening
- · Cast aluminum housing and fan blade
- Stainless steel turbine buckets
- · Separate stainless steel nozzles for high- or low-pressure operation
- · Fan assembly shaft rotates on permanently sealed ball bearings
- Stationery expansion nozzles

COPPUS Marine Ventilators

Water turbine-drive ventilators

MODEL/SPECIFICATIONS

WATER TURBINE DRIVES

MODEL C-12AWC

SUPPLY Model delivers 5,000 cfm (8,495 m3/hr)

MODEL C-15AWC

SUPPLY Model delivers 7,400 cfm (12,573 m3/hr)

- Available adapters for: - Butterworth deck and tank opening (pictured)
- Duct adapter

SAFETY PRECAUTIONS

Always be sure unit is connected to a suitable ground connection. Mounting on non-conductive adapters or free-standing use requires a bonding cable.

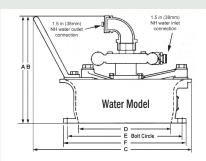

DESCRIPTION

These rugged, dependable cargo tank ventilators have served the shipping industry for many years. They are ideal for on-board gas-freeing, drying and ventilation operations and are available in supply models.

WATER TURBINE-DRIVE MODELS FEATURES / ADVANTAGES

- Cast aluminum anodized turbine housing
- Cast aluminum anodized impeller
- Cast aluminum inlet and outlet water connections
- · Grease-sealed stainless steel ball bearings
- · Cast aluminum fan and fan casing
- · Stainless steel fasteners and protective screen

COPPUS Ventilators Accessories

DUCT CANISTER

Extend the life of your duct with the protection of a COPPUS high-density, light-weight polyethylene canister; makes transporting and storage easier and safer.

Canisters for available duct sizes:

- 8 in x 25 ft (203 mm x 7,500 mm)
- 12 in x 20 ft (305 mm x 6,000 mm)
- 16 in x 30 ft (406 mm x 9,000 mm)

FEATURES AND SPECIFICATIONS - ALL VARIETIES

- Duct: wire supported, non-collapsible
- Quick and easy cinch belt securely fastens duct to blower housings and duct ends
- Integral rigid duct end allows easy coupling of duct without the need for separate splicer accessory
- Available diameters are 8 in (203 mm), 12 in (304.8 mm), 16 in (406 mm), 20 in (508 mm), and 24 in (610 mm); larger diameters available on request
- Available lengths: 10 ft (3 m), 20 ft (6.1 m) and 25 ft (7.6 m); duct can be coupled together for longer runs
- Temperature range: -40° F (-40° C) to +250° F (+121° C)
- Meets UL-94 specifications for flame retardant material
- Retractable for easier, safer storage
- Source capture duct: close-pitched, wire-supported and features smooth interior walls for reduced flow restriction; available in 5 in (127 mm) and 6 in (152 mm) diameters

FLEXIBLE AIR DUCT

A large selection of flexible air duct for a variety of ventilation applications is available. Our most popular heavy-duty duct features impregnated polyester material designed for harsh, industrial environments. Other options include economical

light-duty duct, source capture duct and hazardous location, antistatic duct.

JECTAIR TRIPOD For stationary, long-term use; rotates 360 degrees for precise direction of air-flow and accommodates 3-HP and 6-HP Jectair sizes. Installs quickly and easily with two quick-release clamps. Large feet provide stability during operation, and spring-loaded legs fold up for easy transport and storage.

TRANSPORT CART

Heavy-duty cart allows easier transportation of VANO 175CV and 250CV ventilators (which can remain on cart during operation); includes crane-lifting loop. WEIGHT: 25 lbs (11kg)

VANO TRIPOD

Attaches to VANO 175CV or 250CV model; makes positioning of units and direction of airflow easier by rotating 360 degrees on a 45-degree plane; spring-loaded legs fold up for easy transport and storage. WEIGHT: 19 lbs (9kg) For more than 110 years, COPPUS portable ventilators and cooling products have been recognized as leaders in providing reliable ventilation to meet the demands of safety and maintenance personnel around the world.

INDUSTRIES SERVED

COPPUS portable ventilators serve a variety of industries that require a reliable fresh air supply in confined spaces for process cooling, equipment cooling and personnel cooling to increase safety and improve production.

These industries include:

PAINTING AND COATING: Drying and curing, fume exhaust, fresh air supply for comfort and safety

HIGH-HEAT PROCESS STEEL: Process cooling, personnel cooling

ELECTRIC AND GAS UTILITIES: Underground ventilation, equipment cooling, fume exhaust

PAPER: Confined space ventilation, personnel cooling

SHIPBUILDING: Welding fume exhaust, fresh air supply

MARINE: Cargo tank ventilation

OIL REFINING: Equipment cooling, confined space ventilation, personnel cooling

CHEMICAL MANUFACTURE: Fume exhaust and ventilation, personnel cooling

BEVERAGE: Fume exhaust, process cooling

POWER GENERATION: Confined space ventilation, personnel cooling
